EDUCATION

Bachelor of Software Engineering, FAST NUCES

Jul 2019 – Jun 2023

GPA: 3.56 / 4.0

Achievements: 6x Dean-List of Honors, Ethical Hacking Runner UP, CTF Hackathon Winner

SKILLS

A2A, LangGraph, MCP, LangChain, CrewAI, LLM, VLLM, Amazon Bedrock, Vertex AI, FastAPI, Livekit, Django, NLP, Python, Node.JS, Javascript, React JS, PostgreSQL, MongoDB, MilvusDB, OpenSearch, MLflow, Docker, Airflow

EXPERIENCE

Senior Software Engineer, DisruptLab

July 1, 2025 – present

GrowthAnts - Product Led Growth

- Built an **AI-powered** system that automates product analytics workflows, including **journey mapping**, **cohort analysis**, and **tree-based segmentation** to identify key drivers of user **drop-off**.
- Developed a **churn prediction** pipeline using behavioral event data and billing data to detect at-risk users and enable **proactive retention**.
- Applied **BERTopic-Modeling** on **qualitative feedback** from Intercom, Typeform, and Zendesk to uncover recurring customer issues and **product friction points**.

Software Engineer, DisruptLab

Dec 1, 2024 – July 1, 2025

LiveKit Integration for Vettio

- Developed an advanced **LiveKit** integration to facilitate real-time interview conduction for Vettio.
- Utilized LiveKit's voice pipeline with **Deepgram STT**, **OpenAI TTS**, custom **LLM**, **VAD**, and **turn detection** for enhancing interactivity and speaker management in real-time interviews.
- Injected an **intelligent interview agent** into live meetings using voice pipeline, enhancing the interview process by dynamically conducting context-aware candidate interviews.

Workflow Automation (R&D for Fellows)

- Developed a **directed graph system** with **LLM-based intent recognition** for user queries, enabling accurate task identification, decomposition, and real-time workflow modifications.
- Utilized **LangGraph** for generating workflows, integrating various tools and services (e.g., Gmail, Slack, Jira, and many others) for seamless task automation.

Software Engineer, Savyour - Gaditek

Jul 2, 2024 – Nov 30, 2024

Savvy Chatbot

- Multi-Agent-based chatbot using Qwen2 agents and **Qwen2 LLM** for real-time **customer queries** resolution, replacing traditional customer support.
- Seamless integration with **multiple data sources** and **Plug & Play architecture** for easy deployment.
- Finetuned LLM with **PEFT** and **Q-LoRA** for better accuracy and AI performance.
- Designed a recommendation system using a **two tower architecture** with user and product embeddings, enabling real-time personalized product suggestions and improving user engagement.

Associate Software Engineer, Savyour - Gaditek

Sep 19, 2023 – Jul 2, 2024

SmartSort

- Engineered an adaptable product clustering solution leveraging advanced **AI** algorithms to accurately categorize millions of similar products based on both product names and images.
- **Models Utilized:** **Agglomerative Clustering** (Scikit-learn), **MobileNet** (Keras), **Instructor-large** (Embedding)

CrawlerAI

- Developed a universal web scraping tool proficient in retrieving product details across diverse websites.
- Integrated this seamlessly with LLM & **SearchEngine** tool through **LangChain**.

Savyour Tech Camp, Savyour - Gaditek

Jun 19, 2023 – Sep 19, 2023

Talent Hunter

- Achieved a **90%** success rate in HR **CV screening** by simultaneously minimizing bias, enhancing efficiency, and reducing the time required for screening, ensuring the identification of ideal candidates for requisitions.
- Played a key role in designing **system architecture** and the database schema.
- Utilized VectorDB, **OCR**, **NLP**, **RAG**, **OpenAI**, **PHP**, **Laravel**, and **Vue.js**.

Associate Software Engineer + Trainee, CEE-Solutions

Jan 02, 2023 – Apr 20, 2023

- Developed applications and Node.js services for clients, focusing on **micro-ERP** systems.
- Implemented **Nginx** load balancing for efficient API calls through reverse proxy.
